

Title: Conduct Medical Tests for a Patient

As a healthcare provider, I want to conduct medical tests for a patient through the Hospital Management System (HMS), so that accurate and timely diagnostic information.

Acceptance Criteria:

1. I should be able to access the HMS medical tests section through the healthcare provider portal.
2. Relevant patient information, including medical history and current symptoms, should be displayed to guide the selection of appropriate medical tests.

Confirmation:

Success:

1. After ordering the medical tests, a confirmation message should be displayed, indicating that the tests have been successfully initiated.
2. The patient should receive a notification through the patient portal, informing them about the scheduled tests and providing any necessary instructions.

Failure:

1. If there is an error in the test ordering process, such as incomplete information or incompatible tests, an error message should be displayed, guiding the healthcare provider to correct the information.
2. If there are issues with the sample collection process, an error message should inform the healthcare provider and patient about the problem.
