

**Title:** Collect Report.

As a patient, I want to access, view and download my test reports, so that I can access my medical reports, understand about my health and actively take part in my treatment decisions.

**Acceptance Criteria:**

1. The medical report should include details such as test type, date and any important notes.
2. The medical report should be available to be downloaded in commonly used formats (e.g. PDF).
3. I should be notified when my reports become available.
4. Lastly, my medical information should be kept confidential and secured.

**Confirmation:**

Success:

1. Each time I access a report, a success message should appear, displaying the report details and confirming successful retrieval.
2. After initiating the download, a success confirmation should display, indicating the successful download of the report.
3. Whenever a new report or update is available, a notification should pop up, confirming the availability of new information.
4. An assurance message confirming the security of the patient's medical information should appear within the portal.

Failure:

1. If there is an issue retrieving a report, an error message should appear, indicating the failure and advising to try again later.
2. In case of download failure, an error message should appear, notifying the patient about the issue and suggesting alternative actions.
3. In case of technical issues preventing notifications, an error message should appear, indicating the problem and advising the patient to contact support.
4. If there is a security breach or unauthorized access attempt, an immediate alert message should appear, guiding the patient to report the incident.
