Title: Get Admitted into Hospital.

As a patient, I want to initiate the process of admission through the Hospital Management System (HMS), so that I can receive necessary medical care and treatment at the hospital.

Acceptance Criteria:

1. I should be able to access HMS admission section and provide necessary information.
2. I should receive confirmation of admission and allocated bed with assigned room.

Confirmation:

Success:

1. Upon successful submission of personal and medical details, a confirmation message should display, indicating that the admission process has been initiated.
2. Upon verification and approval of the admission request by hospital staff, a confirmation message should appear, indicating the successful approval of the admission, providing details about the bed number and room.

Failure:

1. If there is a submission failure due to incomplete or incorrect information, an error message should appear, guiding the patient to fill in the necessary details accurately.
2. In case of rejection due to any reason, an error message should be displayed, informing the patient about the rejection and providing alternative instructions or options and if there is an issue with bed allocation, an error message should appear, advising the patient to contact the hospital staff for assistance.
